

The KS3 Curriculum changes in September made systems and control mandatory.

We are offering a CPD half day workshop on 13th January 2009 09:30-12:00.

Don't worry if you have not taught this subject before. This workshop will inform your delivery of systems and control by showing you the new approach to some electronics. It will also provide hands-on opportunities to help participants gain confidence and strategies for teaching more open-ended projects.

Come and find out about:

- Key curriculum changes
- Systems and Components
- Tips to encourage and manage creative working
- Hands-on session exploring control
- QuickLink123+ Project Tools Teaching System

QuickLink Systems

An excellent training opportunity to see a product which will really work in schools which students will enjoy."
Kate Poynter Head of Department Colne Community School and College Essex

"...I found the session very insightful. There were loads of ideas on display to improve my schemes of work."
Geejor
