

HARDWARE

Pictorial Guides & laminated cards approach and support designing and making

Project Tools

Acorn Kits introduce & illustrate many popular Systems & Components

4 Acorn Project Guides may be printed to A4 or followed off-screen for practical working

Fast Prototyping with reusable components (minimizes mistakes)

Push-in Connectors makes modelling easy

For ready class projects, solder modelled Acorn focused tasks with generic FastTrack PCB. (Makes/accomodates 1000 systems)

Interactive Component table makes the learning of components & Symbols fun

Automatically calculate LED protection resistors and display in circuit

Reference chart shows resistor colour codes

Demonstrate Multimeter Functions with drag & drop feature

*** for limited time only**
